

GECF SPECIAL PANEL SESSION ON THE ENVIRONMENTAL ADVANTAGES OF NATURAL GAS WITH A VISIT TO THE YAMAL LNG FACILITIES

Gas Exporting Countries Forum
2 October 2018, Sabetta, Russian Federation
Event of Russian Energy Week 2018

14:30–16:30 Special panel session by the GECF in the framework of the REW (Russian Energy Week) “New LNG global map and environmental advantages of natural gas”

- The LNG market is continuously growing— a trend that has been upheld by global forecasts.
- Environmental and political factors are playing an increasing role in the transformation of LNG markets. Furthermore, emerging players are contributing to these developments.
- In 2018 Yamal LNG shipped its first cargo to European and Asian consumers along the Northern Sea Route.
- An LNG hub is being constructed on the Yamal and Gydan Peninsulas, comprising a potential 20% of global LNG resources.
- How will the global LNG market change by 2030? How should market players adapt during this time of unprecedented change?

Opening remarks

- ▶ **Mr. Leonid Mikhelson**, Chairman of the Board of Directors, NOVATEK
- ▶ **HE Dr. Yury Sentyurin**, Secretary General, GECF
- ▶ **Mr. Dmitry Artyukhov**, Губернатор ЯНАО

Session 1 Russia on the global LNG market. Speaker:

- ▶ **Mr. Pavel Sorokin** – Deputy Minister of Energy (Russia)

Session 2 Climate and ecological changes: challenges and possibilities for natural gas industry. Speakers:

- ▶ **HE Dr. Yury Sentyurin**, Gas Exporting Countries Forum, Secretary General
- ▶ **HE Mr. Gabriel Mbaga Obiang Lima**, Minister of Mines and Hydrocarbons, (Equatorial Guinea)
